Symbolic Spectrum Table (SST) Template (Updated with OSR-Sidereal Protocol)

Within the *Woven Map* framework, where cosmic patterns converge with the chaos of lived experience, the Symbolic Spectrum Table (SST) acts as a rigorous diagnostic tool. It is the compass calibration, ensuring that the signals from the "messy block" of time are not lost in interpretive haze, but are precisely measured against archetypal potential.

Symbolic Spectrum Table (SST) Template

The SST is an empirical tool designed to establish the boundaries of symbolic (narrative) probability for a specific archetypal activation *before* any outcome is definitively known. This prevents the system from dissolving into "metaphor soup" where all distinctions lose meaning.

1. Core Principles & Inputs

- **Purpose:** To map archetypal activation range within symbolic structure, prior to outcome. It assesses the resonance between astrological patterns (the 'Map') and lived experience (the 'Interface').
- **Time as a "Messy Block":** All moments—past, present, future—coexist simultaneously in a vast, interconnected temporal field.
- **Astrology as a "Map":** It highlights energetic landscapes and archetypal themes, not fixed predictions.
- **Personal Agency:** Individuals retain full responsibility for their choices and actions within this framework.
- **Information Needed for Synastry:** Full names (optional), dates, exact times, and locations of birth for all partners involved.

2. SST Structure (Columns)

You're right - GPT-4o needs structured instructions to properly extract astrological data from images. Here's a comprehensive guide you could upload to your GPT's knowledge base:
Astrological Chart Image Reading Instructions

Step 1: Systematic Data Extraction

MANDATORY: Extract in this exact order:

1. Chart Metadata

2. Name (if visible)
3. Birth date, time, location
4. Chart type (natal, transit, composite, etc.)
5. Planetary Positions Format: [Planet] at [Degree] [Minute ' [Sign] in [House number]

Example: Sun at 13°ΘΘ′ Capricorn in 10th house

Moon at 13°ΘΘ′ Pisces in 12th house

6. House Cusps Extract all 12 house cusps with exact degrees:

1st house (ASC): 19° Aries

2nd house: 8° Taurus

[Continue for all 12]

7. Aspects Identify by colored lines:
8. Red lines = Hard aspects (square, opposition)
9. Blue lines = Soft aspects (trine, sextile)
10. Green lines = Minor aspects

Format: [Planet] [aspect] [Planet] (orb X°)

11. Additional Points
12. North Node, South Node
13. Chiron, asteroids (if shown)
14. Part of Fortune
15. Any other marked points

Step 2: Pattern Recognition

Identify these configurations:

1
